

# Student Internship Opportunity at Clemson University for Two-year college students in STEM

Summer 2021

Overview: This NSF-funded Advanced Technological Education (ATE) project has opportunities for students to participate in a STEM-focused internship at Clemson University's Center for Workforce Development. All research will be conducted remotely. The REU students will spend 12 weeks working to understand the efficacy of virtual and augmented reality-based environments for supporting collaborative work. Upon completion of the 12 weeks the students will have completed the project and prepared a presentation of the research.

Participation Period: 12 weeks beginning third week of May

Compensation: \$7,000 for 12-week summer full-time position

Qualifications: This opportunity is open to students majoring in STEM. Other requirements include an excellent academic record, ability to work well independently and in a team setting, and good communication skills.

To Apply: Email Dr. Katie Shakour (kshakou@clemson.edu) your resume and a cover letter that includes a brief description of your interest in participating in the internship. Your resume should include your contact information, applicable completed coursework, previous experience, and anticipated graduation date.

The application period closes May 3, 2021. Applicants will be notified soon thereafter.
